

NATTAKIT KERDTALAY

+6685-062-9238  mx.nattha963@gmail.com  [Nattakit Kerdalay](#)  [RobinTheNewBlack](#)

EDUCATION BACKGROUND

Kasetsart University (Bangkheng)

Bachelor's degree of Industrial Engineering

2015 - 2019

Satriwittaya 2 School

Sciences-Mathematics Program

2011 - 2014

SKILLS

Languages : Python, TypeScript, JavaScript, SQL, English (TOEIC : 730)

Backend : Node.js, Express.js, FastAPI, Nest.js

Frontend : Next.js, React.js, Tailwind, Material UI, HTML, CSS

Database : PostgreSQL, MongoDB, Redis, FAISS, Chroma, Sequelize

DevOps : Docker, Kubernetes, ArgoCD, IaC, CI/CD, Github Action, Bitbucket Pipeline

Cloud : AWS (IAM, VPC, ALB, NLB, EC2, Lambda, ECS, EKS, EBS, S3, ECR, RDS, Aurora, CloudFormation, CloudWatch, KMS, Secrets Manager, Systems Manager)

AI : LangChain, LangGraph, LangSmith, RAG, Agentic AI, MCP, PyTorch, Tensorflow, Scikit-Learn, Image Classification, Object Detect, OCR, Huggingface, Ollama, Groq

Others : OAuth2.0, Keycloak, Jest, Cypress, Jira, Git, GitHub, Bitbucket, Postman, API Dog, Figma

PROJECTS

Sumi.ai :

- Utilizes LLMs and a RAG framework to replace manual resume reviews with high-speed, automated analysis.
- Scores and ranks candidates against specific job requirements to drastically reduce time-to-hire while improving the quality of talent placement.

Zentrix.ai :

- Bridges the gap between complex databases and business users by allowing them to query and interact with data through simple, conversational language.
- Goes beyond basic chat by using intelligent AI agents that independently select and execute tools to analyze, summarize, and track data insights in real-time.

Delph.ai :

- Transforms complex PDF documents into a dynamic chat interface, allowing users to instantly extract insights through natural conversation.
- Leverages LLMs to provide contextually accurate answers that are grounded directly in the uploaded source material for high reliability.

Pettopia :

- A dedicated social space for pet owners to share updates, exchange advice, and engage with a community of animal lovers through a personalized activity feed.
- A comprehensive system for managing pet profiles and medical records, seamlessly linked with essential services such as veterinary, grooming , traveling and a community marketplace.

EXPERIENCES

Genovation

Full Stack Developer

Sep 2024 - Present

- Developed **microservices** web applications using **Express.js**, **React.js** and **Next.js**, mainly focusing on backend development with **REST APIs** and **database management**.
- Configured **OAuth 2.0** Authorization Code Flow within **Keycloak**, implementing JWT-based authentication and role-based access control (**RBAC**) for various services.
- Designed API schemas** and API endpoints for various web services and applications in create documentations in **API Dog**.
- Designed database schemas** for both **NoSQL** and **SQL** databases including **MongoDB** and **PostgreSQL**.
- Containerized web applications using **Dockerfile** and **Docker Compose**, streamlining local development environments and ensuring consistency across staging and production deployments.
- Implemented **container management** and monitoring using **Portainer**, providing real-time visibility into container health, resource usage, and logs for efficient troubleshooting.
- Create **CI/CD** pipelines using **GitHub Actions** and **Bitbucket Pipelines** to automate testing, building, and deployment processes.
- Contributed to design, provisioning, managing and deployment of **AWS** across various services, including **IAM**, **VPC**, **EC2**, **ECS**, **Lambda (Serverless)**, **S3**, **ECR**, **RDS**, **Aurora**, **Systems Manager**, **Secrets Manager**, and **CloudFormation**.
- Write **unittest** using **Jest** to ensure code quality and reliability with **Test-Driven Development (TDD)** approach to match coverage criteria.
- Collaborate with cross-functional teams including designers, product owners and other developers to deliver high-quality software solutions.

Technonedge

Backend Developer (Freelance)

Sep 2025 - Feb 2026

- Developed and maintained robust backend services, ensuring high availability and seamless integration with front-end components.
- Designed and optimized SQL database** schemas, focusing on data integrity, normalization, and query performance to handle complex data structures.
- Designed comprehensive API schemas and **REST APIs** endpoints, creating clear documentation and structured communication layers for internal and external services.

UTAC Thailand

AI & Machine Learning Engineer

May 2022 - Aug 2023

- Developed **Computer Vision models** and selecting optimal architectures to solve specific business problems including **Image Classification**, **Object Detection**, **Semantic Segmentation**, and **OCR**—specifically optimized for high-precision semiconductor quality inspection.
- Performing data collection, cleaning, preprocessing to enhance model performance
- Hyperparameters tuning, optimizing, evaluating, training** and **monitoring** the model performance and retraining the model if necessary
- Designing and developing backend **REST APIs** for handle prediction requests

Tipco Foods

System Analyst

Jan 2021 - Feb 2022

- Developed **ERP**, **Sales Tools** and **POS** Project
- Communicated with site operations and internal department to gather business requirements
- Designed **UX/UI** and documentation, conducted testing and implemented solutions
- Worked closely with developer and other related departments to develop and implement project within the designated timeline

PTG Energy

Trainee (Process Transformation Department)

Aug 2019 - Oct 2019

- Developed the supply chain performance
- Implement **RPA** to internal department
