

NATTAKIT KERDTALAY

+6685-062-9238  mx.nattha963@gmail.com  [Nattakit Kerdalay](#)  [RobinTheNewBlack](#)

EDUCATION BACKGROUND

Kasetsart University (Bangkhen)

Bachelor's degree of Industrial Engineering

2015 - 2019

Satriwittaya 2 School

Sciences-Mathematics Program

2011 - 2014

SKILLS

Languages : Python, TypeScript, JavaScript, SQL, English (TOEIC : 730)

Backend : Node.js, Nest.js, Express.js, FastAPI

Frontend : Next.js, React.js, Tailwind, Material UI, HTML, CSS

Database : PostgreSQL, MongoDB, Redis, FAISS, Chroma, Sequelize, Prisma

DevOps : Docker, Kubernetes, Terraform, CI/CD, Github Action, Bitbucket Pipeline, Portainer

Cloud : AWS (IAM, VPC, EC2, Lambda, ECS, EKS, EBS, S3, ECR, RDS, Aurora, CloudFormation, CloudWatch, KMS, Secrets Manager, Systems Manager)

AI : LangChain, LangGraph, RAG, Agentic AI, MCP, PyTorch, Tensorflow, Scikit-Learn, Image Classification, Object Detect, OCR, Huggingface, Ollama, Groq

Others : OAuth2.0, Keycloak, Jest, Cypress, Jira, Git, GitHub, Bitbucket, Postman, API Dog, Figma

PROJECTS

Sumi.ai : (AI-powered resume screening and candidate prescreening platform)

- Utilizes LLMs and a RAG framework to replace manual resume reviews with high-speed, automated analysis.
- Scores and ranks candidates against specific job requirements to drastically reduce time-to-hire while improving the quality of talent placement.

Zentrix.ai : (AI-powered natural language database querying and analysis)

- Bridges the gap between complex databases and business users by allowing them to query and interact with data through simple, conversational language.
- Goes beyond basic chat by using intelligent AI agents that independently select and execute tools to analyze, summarize, and track data insights in real-time.

Delph.ai : (RAG-based conversational AI for intelligent PDF interaction)

- Transforms complex PDF documents into a dynamic chat interface, allowing users to instantly extract insights through natural conversation.
- Leverages LLMs to provide contextually accurate answers that are grounded directly in the uploaded source material for high reliability.

Coda.ai : (AI-driven workflow that automates the development lifecycle from jira to code)

- Developed a multi-agent orchestration system that automates task management by transforming Jira requirements into production-ready code.
- Streamlines the SDLC by autonomously creating branches, implementing features, and opening Pull Requests with integrated diff analysis.

EXPERIENCES

Genovation

Sep 2024 - Present

Full Stack Developer

- Architected **AI-driven agents** to automate development workflows, optimizing productivity and maintaining high standards of code quality across software development life cycle.
- Developed web applications using **Express.js**, **React.js** and **Next.js**, primarily focusing on backend REST APIs and database management.
- Configured **OAuth 2.0** and **OIDC** within **Keycloak**, implementing JWT-based authentication, Role-Based Access Control (**RBAC**), Attributes-Based Access Control (**ABAC**).
- Designed API schemas and endpoints including comprehensive documentations using **API Dog** to ensure seamless team collaboration.
- Designed **NoSQL** and **SQL** database schemas using **MongoDB** and **PostgreSQL**, optimizing for data integrity and query performance
- Wrote comprehensive unit tests using **Jest** to ensure code quality and reliability to match coverage criteria.
- Leveraged **Docker** for microservices containerization, managing multi-container architectures and monitoring containers health.
- Built and maintained **CI/CD** pipelines using **GitHub Actions** and **Bitbucket Pipelines** to automate testing, building, and deployment processes.
- Collaborated on **Cloud Architecture** design, provisioning, managing and deployment of **AWS** across various services
- Managed end-to-end **production deployments** to ensure high availability, seamlessly migrating applications from staging to cloud production environments.

Technonedge

Sep 2025 - Feb 2026

Backend Developer (Freelance)

- Developed and maintained robust backend services, ensuring high availability and seamless integration with front-end components.
- Designed and optimized SQL database** schemas, focusing on data integrity, normalization, and query performance to handle complex data structures.
- Designed comprehensive API schemas and **REST APIs** endpoints, creating clear documentation and structured communication layers for internal and external services.

UTAC Thailand

May 2022 - Aug 2023

AI & Machine Learning Engineer

- Developed **Computer Vision models** and selecting optimal architectures to solve specific business problems including **Image Classification**, **Object Detection**, **Semantic Segmentation**, and **OCR**—specifically optimized for high-precision semiconductor quality inspection.
- Performing data collection, cleaning, preprocessing to enhance model performance
- Hyperparameters tuning, optimizing, evaluating, training and monitoring** the model performance and retraining the model if necessary
- Designing and developing backend **REST APIs** for handle prediction requests

Tipco Foods

Jan 2021 - Feb 2022

System Analyst

- Developed **ERP**, **Sales Tools** and **POS** Project
- Communicated with site operations and internal department to gather business requirements
- Designed **UX/UI** and documentation, conducted testing and implemented solutions

PTG Energy

Aug 2019 - Oct 2019

Trainee (Process Transformation Department)

- Developed the supply chain performance
- Implement **RPA** to internal department
